Computer Networks and ISDN Systems 21 (1991) 419–420
North-Holland

Author Index to Volume 21 (1991)

(The issue number is given in front of the pagination)

Akkerhuis, J., *see* **Rosenberg, J.** (3) 211–220

Bathe, C., *see* **Nelson, J.** (3) 175–185
Belovich, S.G. and **V.K. Konangi**, A linear-time approximation method for computing the reliability of a network (2) 121–127
Bhargava, B., E. Mafla and **J. Riedl**, Communication in the Raid distributed database system (2) 81– 92
Bormann, C., *see* **Bormann, U.** (3) 149–163
Bormann, U. and **C. Bormann**, Standards for open document processing: current state and future developments (3) 149–163
Brill, M. and **U. Gramm**, MMS: MAP application services for the manufacturing industry (5) 357–380
Brown, H., *see* **Cole, F.** (3) 221–230

Campbell-Grant, I., *see* **Nelson, J.** (3) 175–185
Chang, J.-F. and **T.-H. Yang**, The effect of prioritization on the behavior of a finite queue with batch Poisson inputs and a synchronous server (1) 1– 16
Christ, P., The environment of the Stuttgart Tetrahedron (4) 253–260
Christ, U., *see* **Schulz, K.-J.** (4) 275–283
Cole, F. and **H. Brown**, ODA extensions for quality and flexibility (3) 221–230
Coon, M., *see* **Nelson, J.** (3) 175–185
Cooper, R., J.S. Hutton and **I.L. Smith**, From JANET to SuperJANET (4) 347–351
Crowcroft, J., *see* **Kirstein, P.T.** (4) 261–273

Faci, M., L. Logrippo and **B. Stepien**, Formal specification of telephone systems in LOTOS: the constraint-oriented style approach (1) 53– 67
Filip, W., J. Kämper and **W. Knobloch**, Conversion between ODA Level 2 and RFT:DCA—experiences with a prototype (3) 197–210
Fischer, K., *see* **Nelson, J.** (3) 175–185
Fui, J.T., *see* **Hamilton, Jr., R.L.** (5) 399–415

Golkar, S.N., P.T. Kirstein and **A. Montaser-Kohsari**, ODA activities at University College London (3) 187–196
Golshani, F. and **B. Huey**, Managing complexity: protocols and reliability (2) 79– 80
Gramm, U., *see* **Brill, M.** (5) 357–380
Grnarov, A.L., *see* **Karadimce, A.P.** (2) 129–142

Hamilton, Jr., R.L. and **J.T. Fui**, A matrix-geometric model for a CSMA/CD network with a gateway (5) 399–415
Harris, R.A., *see* **Koudelka, O.** (4) 285–292
Heinänen, J., Review of backbone technologies (4) 239–245
Huey, B., *see* **Golshani, F.** (2) 79– 80
Hutton, J.S., *see* **Cooper, R.** (4) 347–351

Kämper, J., *see* **Filip, W.** (3) 197–210
Karadimce, A.P., R.R. Seban and **A.L. Grnarov**, A general-purpose, high performance algorithm for distributed systems reliability evaluation (2) 129–142
Kaufmann, P., Technical concept for the high-speed data network (HDN) in DFN (4) 335–342
Kirstein, P.T., *see* **Golkar, S.N.** (3) 187–196
Kirstein, P., *see* **Nelson, J.** (3) 175–185
Kirstein, P.T. and **J. Crowcroft**, International links for research collaboration (4) 261–273
Knobloch, W., *see* **Filip, W.** (3) 197–210
Konangi, V.K., *see* **Belovich, S.G.** (2) 121–127
Kongsli, T.A., S.A. Solbakk, L. Steinbakk and **L.K. Vognild**, The ELDORADO project—a Norwegian project on high speed communication (4) 293–297
Koudelka, O. and **R.A. Harris**, LAN interconnection by satellite and the COST 226 project (4) 285–292
Krönert, G., *see* **Nelson, J.** (3) 175–185

Liu, M.T., *see* **Shu, J.C.** (2) 93–108
Logrippo, L., *see* **Faci, M.** (1) 53– 67
